UOVision 2019

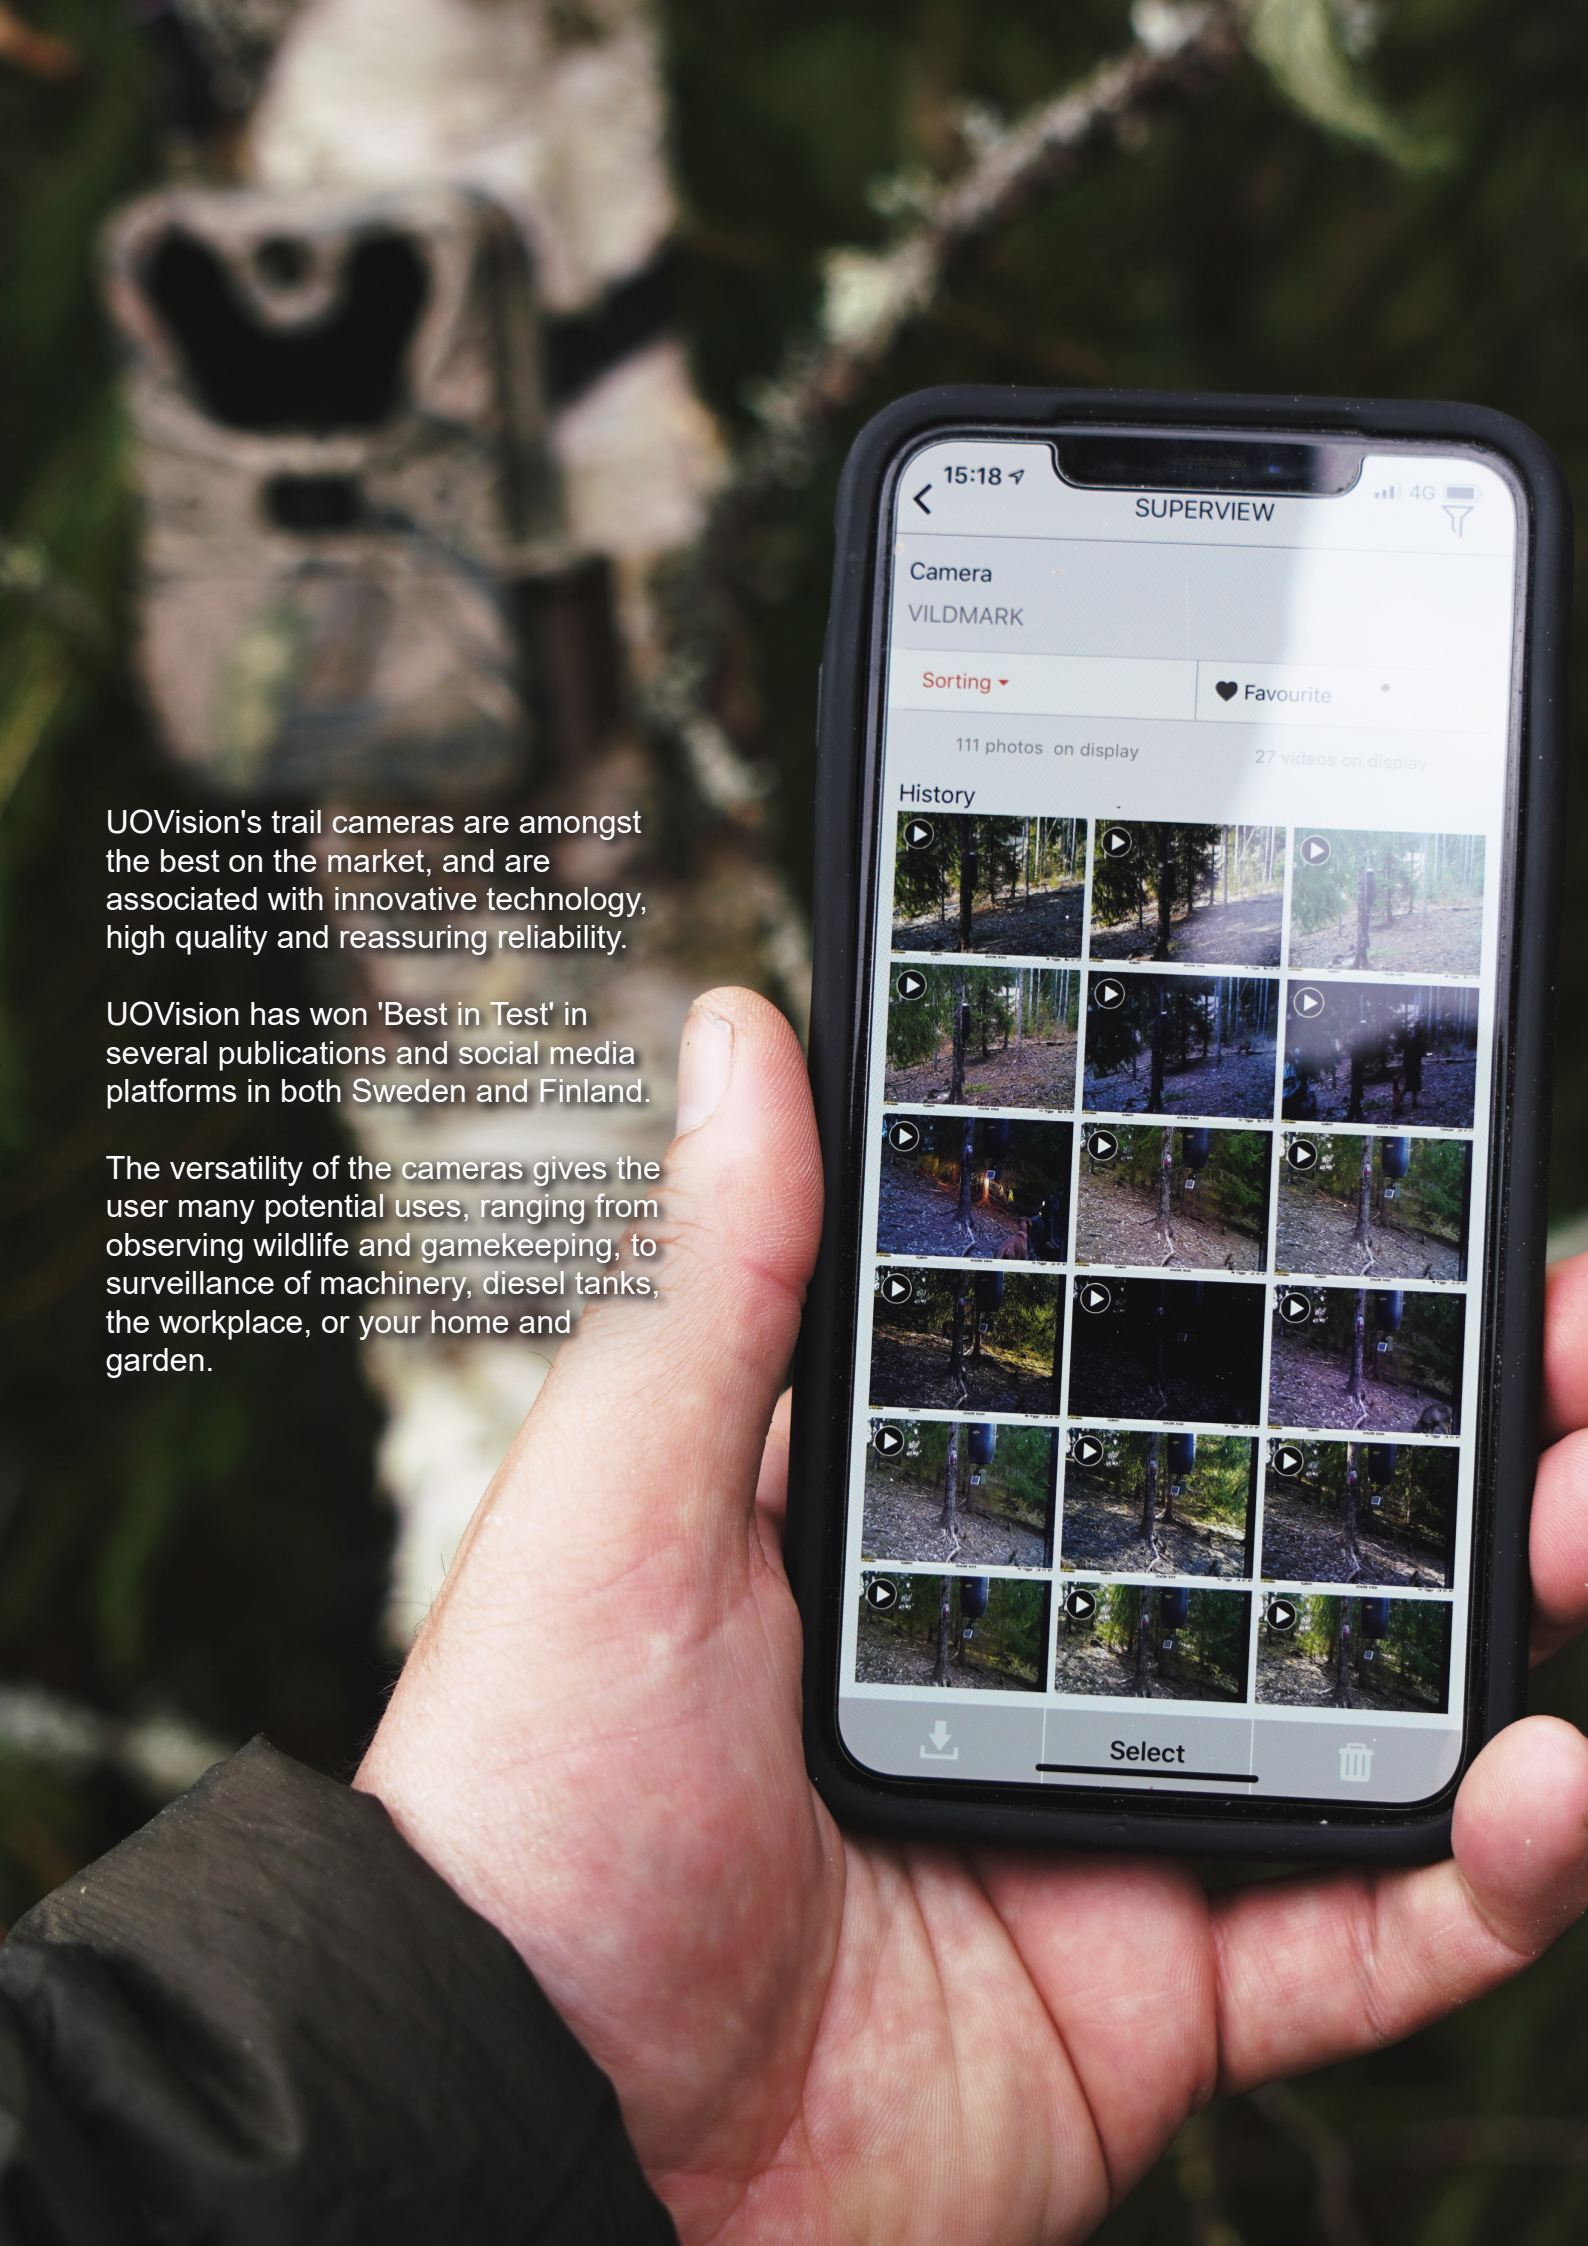
NEW

Cloud-based cameras easily controlled via app from your mobile device.

UOVision's trail cameras are amongst the best on the market, and are associated with innovative technology, high quality and reassuring reliability.

UOVision has won 'Best in Test' in several publications and social media platforms in both Sweden and Finland.

The versatility of the cameras gives the user many potential uses, ranging from observing wildlife and gamekeeping, to surveillance of machinery, diesel tanks, the workplace, or your home and garden.



Cloud/App-models

UOVision

NEW!

Cloud/Cloud-based cameras that are managed entirely via app and/or web portal. The app quickly receives photo and video from your camera and provides a very good overview of the camera's settings, structuring the images in an optimal way regardless of how many cameras you use.
You have full access to the camera's photos and videos and can change any settings via the app or web wherever you are in the world.
Installation is also simple. The camera automatically connects to the operator's network and by reading the camera's serial number, the camera quickly connects with the app! The advantages of cloud cameras to "traditional models" are:
• Very easy to install/get started with.
• All images and videos are collected in a free app and web portal that provides a good overview of your photos and cameras.
• Unlimited cameras can be added to each account.
• Up to 12 guest accounts can be created and 12 cameras can be shared. Perfect for teams, wildlife associations, government authorities and companies etc.
• Sends high-resolution images and video to the cloud service (Video applies to the UM785, Glory & HomeGuard models).

Glory 4G/LTE 20mp

When you will have the best surveillance features! Glory has a genuine 4G/ LTE module with a 20mp sensor that delivers high quality photos and HD videos directly to your mobile. Managed entirely via app and / or web portal.
Thanks to the modern GSM module, camera images and video transmit quickly over the 4G network (also works with 2- & 3G). Timers, invisible IR flash and remote control via the app are just a few examples of Glory's smart features. Ideal for monitoring wild game, workplaces and machinery, storage, etc.
Art Nr: 90-060

UM785-3G HD Cloud

The camera sends high-resolution images and HD video with sound recording via the app and web. Motion sensor response time of 0.6 seconds. Thanks to the modern GSM module, the camera transmits images and video quickly over the 3.75G network. The camera has many smart features such as weekly timer, time lapse, invisible IR flash and remote control via app. Ideal for monitoring wildlife, the workplace, machinery, stores, holiday homes, etc.
Art nr: 90-004

UM595-3G Cloud

Sends high quality pictures quickly via the app and web.
Invisible IR flash, timer and time lapse options, remote control via app or web. Motion sensor response time of 0.9 seconds. The app is available for both iOS and android. Perfect for monitoring wildlife or game, machinery, storage etc.
Art nr: 90-067

HomeGuard W1 WiFi

A camera that builds on the same basic concept as other UOVision models but is developed with features that focus more on home, office, workplace monitoring etc. The biggest difference with other wireless cameras from UOVision is that HomeGuard uses WiFi networks to send photo and video instead of mobile network (GSM). You can easily connect HomeGuard to, for example, the workplace or the home's existing Wifi network and with no additional network costs for the camera.
Art nr: 90-035

MMS & E-mail-models

Traditional models that send images to mobile numbers via MMS or photos and video clips to email address (video applies to UM785). All models send high quality pictures. The test winner UM785 sends both video clips and high-resolution photos and has most of the features you can wish for in a Trail Camera. It is a great favorite among individuals, authorities and companies.

"The Uovision UM785 does not have a single obvious technical defect."

UM785-3G HD

A very popular model and multiple test winner. The camera sends very high resolution images to your email address or mobile number. Also sends video clips in FullHD resolution with audio recording to your email. Thanks to the modern GSM module, the camera transmits images and video quickly over the 3.75G network. The camera has many smart features such as weekly timer, invisible IR flash, remote control via APP or SMS. Ideal for monitoring the workplace, machines, stores, holiday homes, wildlife or game etc.

Art nr: 90-050B

UM595-3G

Test winner in Allt Om Jakt & Vapen, Dec 2016. Sends high quality pictures to email and mobile telephone. Invisible IR flash, remote control via app or SMS etc. Perfect for monitoring wildlife or game, machines, storage etc.

Art nr: 10-008B

UM595-2G

A very affordable model from UOVision, the camera sends pictures to your email or mobile telephone. Features include Invisible IR flash, remote control via app or SMS etc. Bluetooth APP for easy programming, especially if you have several cameras in your monitoring network.

Art nr: 10-019B

UOVision LTA

A simple but very practical alarm. LTA is a so-called magnetic alarm - when the magnet detaches from the alarm, LTA sends an SMS to your mobile phone. You can call the alarm and listen to see if you hear sounds or voices. Works great as an alarm on doors or a vehicle. **Art nr: 205-001**

Non-sending Models

Cameras that store video clips and photos on a memory card, perfect for monitoring and documenting what's happening on a particular site.
It is a good complement to a cloud camera if you want to quickly have pictures on the phone or computer but also film events at the camera site.

UV785 HD

High quality picture resolution. FullHD video quality with sound recording. Motif program for optimized photography. Weekly timer, Invisible IR flash.
UV785 HD, for when you want the best picture quality and most features. Perfect for monitoring in a variety of areas.

Art nr: 90-051B

UV595 Extreme HD

Takes quality, high resolution images up to 12MP. FullHD video quality with sound recording. Invisible IR flash. A popular model, perfect if you want to monitor a site that is exposed to eg vandalism, theft etc.
A very popular model in Sweden.

Art nr: 90-052B

UV557 mini

Ideal if you want to be extra discreet with monitoring. The camera has a very small format and is easy to place. Perfect if you want to monitor a site that is exposed to eg vandalism, theft.

Art nr: 90-077A
