#### **About our courses:**

### **Food Hygiene Level 2**

This qualification is ideal for anyone working in the catering and hospitality industry (or those about to start work or whom are already working in the industry). Learners gaining this qualification will know that food safety is the responsibility of everyone involved in the storage, preparation, cooking service and handling of food.

### Food Allergen Awareness Level 2

This qualification is aimed at food handlers and other staff involved in food preparation and service who work within the catering industry. The objective of the qualification is to support a role in the workplace. It is designed to provide knowledge and understanding of food allergens and foods commonly causing intolerances, their characteristics and effects, the importance of effectively communicating information regarding allergenic ingredients to customers, and how staff can minimise the risk of cross-contamination from allergenic ingredients.

### **Managing Change and Developing Services**

This gives managers a tool kit to manage change, understand the different techniques used to bring a change to fruition and explore and evaluate service development. We will show you how to produce a substantive business case for a new service you wish to introduce with pointers to help your funders and stakeholders to understand & support your proposal.

### **Budgeting Skills for Care Home Managers**

Want to read management accounts but are not sure how? Would like to present a business case for a new service, but need to calculate the financial implications? Time to write the budget for your service, but want to have the confidence you have considered the full financial implications. This course is for you.
