A Snapshot Of Future Planning

Will - One of the most important legal documents you will write allowing you to have complete control of your future, protect your assets and look after your family.

Lasting Powers of Attorney - protect yourself and your loved ones should mental or physical capacity be lost. You or your chosen Attorney can take charge of decisions in health and welfare and property and financial affairs.

Probate - refers to the general administering of a deceased person's will or the estate of a deceased person without a will. We can provide an end to end service during an often difficult time.

Advanced Directives - referred to as a Living Will, a document that lets you state your wishes for end-of-life medical care should you not be able to make decisions yourself.

Inheritance Tax - we are experts in this field and will complete Inheritance tax declarations as part of the probate process or before, whilst always advising on ways to pay less tax.

Court of Protection Applications - this court deals with decisions or actions under the Mental Capacity Act. You (or someone helping you) would need to apply to the Court if someone needs permission from the Court to make decisions about your health, welfare, financial affairs, or property. This is a comprehensive process - let us do it for you.
