NON SURGICAL FACE & BODY LIFTING

The Genie Non Surgical Face Lift can be thought of as a personal trainer for the face.

When the facial muscles begin to shrink the drooping effect on the face can be very aging. By rebuilding the aging muscle mass to its previous state the face is fuller and benefits from a visible lift which can be obtained with regular treatments.

This fuller, healthier look also helps to eliminate many lines and wrinkles because the muscles are subjected to 'power building'. For 24 hours after the treatment, the muscles are still working and regenerating themselves.
