

HOW IT WORKS

At Secure screening services we have developed a portal that is both easy to navigate and is completely transparent during the screening process.

It's simple to create an account and add the details of the person to be screened, select the level of screening and leave the rest to us. We will contact the candidate and obtain all the information and let you know when the screening process is complete.

We have made the portal as interactive and user friendly as possible and you can check for updates along the way.

We know that this candidate experience reflects on your organisations reputation.

You can trust us to deliver a professional service in a timely manner.

EMPLOYMENT SCREENING

Our screening packages cover a wide range of needs and budgets. We also offer bespoke screening solution as we know that one size doesn't always fit all and that some checks are more relevant to specific industries. All reports are compiled professionally and in a way we can all understand.

CHARITY SCREENING

Screening your employees and volunteers enables you to safeguard the very people you are there to help. We provide screening that reduces the threat, harm and risk to the charities reputation and keeps people safe.

It is designed to attract the right people to your organisation and give you peace of mind going forwards. This screening will be integral to your safeguarding protocols and minimise any possible future litigation.
