

Pups-R-uS

When students initially contact us, many of them are already asking for guidance because their puppy is displaying behaviour that they find both frustrating and upsetting. Many of these behaviour traits can be very distressing for the new puppy owner. It might be surprising to many that bad habits have actually been taught and encouraged by loving owners and members of the family who simply don't have an understanding of the differences between human and canine perception. Such habits could easily have been avoided with a little forethought and understanding of the canine mind, this of course is where our **PUPPY HOME START** service can be a major benefit as owners and their families are shown how to 'Get it Right' from day one.

Since 1986 our popular **PUPPY SOCIALISATION** and basic training courses in the area have helped owners get the very best from their puppies as they grow into happy, well behaved adult dogs that are a pleasure to own and to take out.

When you book a **PUPPY HOME START** visit you can be assured that one of our top instructors will visit at a time convenient to include the whole family and bring all the educational training aids that you should require and show you how to use them to get the greatest benefit. We will answer all your questions and with the puppy in its home environment we can see first-hand any potential problem areas where you might need a little extra guidance.

With our **TRAINING COURSES** you will be welcomed into a training class suited to both you and your puppy. Our classes are number restricted to ensure the correct balance of instructor/student ratio to enable you to get the most from the experienced instructors available. We have on hand all the training equipment you will need in addition to educational and interactive toys. Our classes are fun based and also enable your dog to experience a high level of human and canine socialisation.
