

Technical Services

Refrigeration | Air Conditioning | Electrical | Plumbing & Renewables

Survey. Design. Installation. Service. Maintenance.

Ian Hobbs Technical Services was established in 1983 and has become a leading multi-disciplined installation and service provider in refrigeration, air conditioning, plumbing, heating and electrical engineering.

Our integrated facilities management offers you innovation, technology and solutions all under one roof. This allows our customers to benefit from our tailored solutions as an individual service or as a full facilities arrangement offer.

From initial site survey and design through to installation, testing and commissioning we provide a first class, 24 hour service. It is our job to deliver sustainable, cost effective solutions to enable you to perform at your best and our dedicated service team to provide you with post installation peace of mind.

Our vision is to be nothing less than innovative, responsible and to give true value to our customers through our uncompromising focus on quality.

We also offer comprehensive service maintenance contracts which are tailored to meet each clients' specific needs.

Ventilation

Ventilation is the process of replacing air in any space to provide high indoor air quality. This may be to control temperature, replenish oxygen, or remove moisture, odours, smoke, heat, dust, airborne bacteria, and carbon dioxide.

Ian Hobbs Technical Services provide design, installation and maintenance of commercial and industrial ventilation systems.

Our Ventilation Services include:

- Industrial & Commercial Environmental Control
- Fume Extraction
- Odour Control
- Dust Extraction
- Heat Recovery / Heating
- Kitchen Ventilation
- Total Heat Exchangers
- Acoustic Enclosures
- Specialist Cooling Applications
- New Building Services & Refurbishment
- Refurbishment of Air Handling Units
- Ductwork Manufacture
- Total Turnkey Solutions

Renewables

With increasing fuel costs and concerns over climate change, we encourage our customers to save energy, reduce environmental impacts and promote resource conservation. Each of our services can be tailored to meet the needs of today, whilst thinking about the future.

Here's an insight to a few ways renewable energy can be used with the help of Ian Hobbs Technical Services:

- Renewable Energy Surveys
- Air Source Heat Pumps
- Ground Source Heat Pumps
- Biomass
- Solar Panel Electricity Systems (PV)
- Solar Thermal
- Wind Generators

If you would like more information on any of our services or would like to find out more about what we can offer you, please contact the office.
