

The
Classic Door
Collection

SAFE & SOUND

Your front door is the first point of contact with your home. With the reassuring ‘clunk and click’ as it closes behind you, you’re able to shut rest of the world outside, relax and unwind.

Our range of high security, low maintenance and energy efficient, traditional and contemporary composite front and back doors, has been specially selected to give you a choice of design and style to perfectly compliment your property. You can’t choose a better composite door.

FIVE EASY STEPS

Door shown is the Belfry in Cream White featuring Bullseye glass

NOT ALL DOORS ARE MADE EQUAL

Our composite doors combine the latest innovations, to keep your home warm and secure, whatever the weather. Emulating the natural beauty of wood with an energy efficient warm core technology and high security, smart ready multi-point locking system, our composite doors are an elegant addition to any home.

Manufactured to the British Standards Institute kitemark accreditation for Quality Management, BSI9001, they're also built to last.

Multi-point smart equipped locking

High security steel hooks fully penetrate the door frame keeps, which help to prevent the door sash and frame from being forced apart. A steel deadbolt delivers maximum strength to the centre of the door.

1 The appearance of natural timber but without the maintenance

Composite doors emulate the natural appearance of a traditional timber door but without the associated maintenance. They won't warp or expand and don't require painting. A tough and durable timber-grain effect impact resistant GRP skin, will stand up to the knocks bangs and scrapes that family life throws at it!

2 Insulated thermally efficient core

Our doors are manufactured from a thermally efficient and tough high density polyurethane foam core. This has been specially developed to significantly reduce the transfer of heat, making our doors almost 20 per cent better at keeping the warmth inside your home and your energy costs lower, than a traditional solid timber door.

3 Sound insulation

The polyurethane core offers great sound insulation, reducing outdoor noise by an average of 31dB.

4 Colour choice

Choose from 8 standard -colour finishes or a choice of 38 premium colour options, making the colour choice for your home as individual as you are.

5 Weathertight

The insulated core is protected from water and moisture ingress by a high performance polymer skin. This is specially constructed to prevent the delamination which can effect lesser quality doors, guaranteeing performance for years to come. Strong stainless steel door hinges and robust gaskets ensure that the door makes the perfect seal against the frame. Our doors are also fully tested to all relevant British Standards.

6 Energy efficient glazing

Our doors feature the latest in energy efficient double and triple-glazed glass technology to keep your home warmer. Manufactured to the British Standard BS1 EN1279, this includes a full choice of glass types and styles from privacy glass to coloured, crystal and leaded finishes, which means you can design the perfect door for your home.

7 BSI Kitemark accredited handles and hardware

Our doors are manufactured to the highest security standards. BSI Kitemark accredited multi-point locking mechanisms, keeps and handles are included as standard. You can choose anti-lift, anti-drill and anti-pick locking cylinders that meet and exceed all current building standards including PAS24:2016, because your security and that of your home and family matters.

8 Mobility

All of our doors come with an optional mobility low threshold, ideal for wheelchair use or with pushchairs. Our hinges also open past 90 degrees for optimal access.

9 Door furniture

Define your style with a choice of handles, letter-plates, door knockers and spy holes available in satin, white, gold, chrome and black finishes. See page 45 for more details.

10 Hinges

High spec hinges with traditional and improved aesthetics provided without any compromise to the user friendly mechanics, or security performance. Our hinges also open past 90 degrees for optimal access.

11 Integrated Venetian Blind

Cleverly encapsulated within the insulated glass cavity, the Venetian blind provides a zero-maintenance solution to our Lytham door style. The blind can be easily raised, lowered and tilted using the unobtrusive fingertip control on the edge of the frame.

With one home in England and Wales broken into every seven seconds – the majority by forcing or kicking a door – your front or back door is at the ‘frontline’ in the battle to protect your home from intruders. All of our doors can be supplied to a Secured By Design standard*

PEACE OF MIND BUILT IN

This means that they meet not only the requirements for door security set out in PAS 24:2016 and Part Q of Building Regulations* but have been independently tested as doing so, as defined by the police approved Secured by Design scheme.

Setting the Standard for Door Security

Our doors have been independently tested against the following type of assault:

- Manual attack on the locking hardware with tools including screwdrivers, chisels and mole grips
- Three minute attacks on the door cylinder using a range of tools including craft knives and screw drivers
- Three minute manual attacks using chisels and brick bolsters
- Hard-body impact testing of the leaf, hinge and locking points using a 50kg steel impactor.

Multi-point locking
High security steel hooks fully penetrate the door frame keeps, which help to prevent the door sash and frame from being forced apart. A steel deadbolt delivers maximum strength to the centre of the door.

High security door cylinder
Anti-bump, anti-drill, anti-pick and anti-snap Kitemarked cylinder lock options available.

Reinforcement and thickening of door frame
The use of reinforcements and local thickening of the door frame provide a stronger fix and improved hardware retention and screw through-pull, locking the sash and frame firmly together.

Laminated glass units
Internally glazed 6.8mm toughened laminated glass energy efficient units provide increased resistance to attack, if selected. All glazing is supplied as Energy PLUS, incorporating ‘Low E’ glass and Argon filled.

Robust hinges
Supplied as standard, stainless steel hinges provide resistance to resistance testing with 50kg steel impactor. Featuring minimalist aesthetic design lines.

Secured By Design Letterplate
Designed to meet the exacting requirements of TS008. It's suitable for doorsets that need to be Document Q or PAS 24: 2016 compliant. Manufactured from 304 Stainless Steel for ultimate corrosion resistance.

SMART EQUIPPED™ DOORS

Be sure it's secure

How many times have you thought...have I locked my door? We've all been there!

With Kubu you'll never have to worry if your door is unlocked again.

Kubu uses smart and simple technology to monitor your lock in real time. You'll be able to check the status of your door no matter where you are, at any time of the day, right from the Kubu app on your phone. With Kubu say goodbye to uncertainty and hello to peace-of-mind.

Be sure it's secure

What does the Kubu App do?

- It lets you see the status of your door (locked/unlocked).
- Get notifications with every turn of the key.
- You can schedule notifications when you want.
- It shows the history of your doors.
- You can share your door with family and friends.
- Its perimeter feature helps to prevent you from leaving your home unlocked.

Kubu couldn't be easier to set up, taking under 15 minutes.

1. Purchase your Kubu Home Hub and Door Module online.
2. Plug in your Kubu Home Hub, and connect to your wi-fi.
3. Fit the Kubu Door Module into your Kubu Equipped Door.
4. Download the Kubu App and set up your doors.

Be sure it's secure

- From any place in the world.
- At anytime, day or night.
- On all the doors in your home.
- On all the homes that you look after.

* Please note: Kubu Smart Technology is not available on slam shut doors.

Download the app

Kubu Home Hub

Door Module

Your composite door will include Smart technology, as standard.

Almost all white goods that we buy come with a colour coded and alphabetical energy rating running from A to G, with 'A' indicating the highest level of energy efficiency.

Well, it's exactly the same for doors and windows.

UNDERSTANDING DOOR ENERGY EFFICIENCY

The exact energy efficiency of your new door will depend on a number of different factors including the style of door you choose and glass but all feature our warm core foam technology.

This maximises the thermal efficiency of your new composite door, making it up to almost 20 per cent more energy efficient than a traditional solid timber door.

1 Foam core

High Density polyurethane foam core provides an insulating thermal barrier between warm air inside the home and cold air outside

2 Thermally efficient door frame

Multi-chamber thermally efficient composite door frame

3 High performance door gasket

High performance door gasket and adjustable door hinges deliver a firm and consistent compression between the door frame and sash, stopping draughts

4 Threshold

Weather proof threshold and brushes reduce the flow of air under the door

Door style is Gleneagles in Slate featuring Reflections glass

CHOOSING YOUR DOOR

Your choice of door defines the individual character of your property. Choose the perfect complement for your home from our refined collection of energy efficient and beautifully crafted doors.

From the elegant understatement of a traditional design or stylish contemporary statement door, you can build the perfect match for your property. This includes a choice of finish from a carefully chosen palette of colour options, sophisticated glass designs and as a final touch, combining function and form, our range of high quality door furniture.

GLENEAGLES

With its American styling, the Gleneagles composite door is proving to be as popular here in the UK.

With its clean crisp sightlines, flush finish and bold glazing options Augusta is a true statement door. Evoking the glamour of the art deco period, its sophisticated styling is carried through to a dedicated contemporary hardware range.

CONTEMPORARY DOORS

DOOR LIGHT AND GLASS OPTIONS

Esprit provides a canvas for your creativity. It's your choice of door light design and the glass that you decide to put in it, that really brings this stylish and contemporary door to life.

Door light design options include minimalist single centre or off-centre designs, through to repeating 'stacked' designs. A choice of cool curves or stunning diamond bursts lights are also available.

Shape the character of your door further with your choice of glass, from simple privacy glass to more detailed designs.

HARDWARE OPTIONS

In addition to our standard ranges, Augusta comes with a dedicated range of pull handles. Available in three different sizes, handles feature a contemporary satin stainless steel finish, the refined design providing the all-important finishing touch to the design of your door.

550mm 720mm 1400mm

(Indicative lock position only for the 550mm, 720mm and 1400mm)

The 550mm and 720mm pull handle, the key position is 928mm from the bottom of the slab.

The high key position on the 1400mm pull handle, the key position is always 1379.5mm from the bottom of the slab.

Pull bar outside only incorporates our Cylinder Door Pull (E80700/01/02)

Pull bar both sides incorporates our Pull Bar Escutcheon in satin (DAAFSSOVE)

Thumbturn Cylinder

With our Unique "Click Secure" thumbturn design our thumbturn euro cylinder provides a simple method of opening and closing the door from the inside without a key, and allows for a quick and safe exit in the event of a fire.

* Kubu Smart Technology not available on this range.

DOOR COLOUR OPTIONS

Standard Colours

We offer a range of 8 external colours with a white interior as standard. Coloured both sides available as a cost option.

* Please note that due to the physical differences of a PVC-U outerframe and the GRP skin of the door, we cannot guarantee an exact colour match of door and outerframe.

RAL Colours

Any RAL colour is available from us as a special order. Here are the most requested colours as an example.

**Premium Colours**

Our range of 38 premium colours are created using state-of-the-art coating technologies as used in the yacht industry. The paint has been prepared to the recommended gloss level which range from a Semi-Matt, Satin or Semi-Gloss sheen dependent upon colour.

Door style is Belfry in Chartwell Green

Door style is Seminole in Clay featuring Reflections glass

Door style is Augusta in Cream White featuring Prairie glass

FRAMING YOUR DOOR

YOU CAN ALSO CHOOSE THE COLOUR AND FINISH OF YOUR DOOR FRAME.

The classic design of a white door frame against a solid door colour provides contrast, showing off your door but you can also choose subtle combinations, which will connect your door to the fabric of your home that surrounds it.

Choose from standard white, light oak or rosewood finishes or your individual colour choice.

You can also choose to have a colour finish on the outside and white inside, or any combination of colours inside and out.

HANDLES, HARDWARE & DOOR FURNITURE

Your door handle is the part of your new door that you'll touch each and every day. Your letter plate, choice of knocker, all come together to put the all-important finishing touches to your new door.

Whether you're designing a contemporary, bold, statement door, or recreating the timeless charm of a period installation, we can offer you the perfect choice of lever, pad lever, heritage or contemporary pull handles available in white, gold, chrome black and satin finishes.

We also offer a Long Lever easier to grip Handle (3rd column above) which offers a greater, smooth action and low operating forces required to operate handle. The ample lever-to-door surface clearance option, are Compliant with Document M of the The Disability Discrimination Act (DDA), which states that the door handle needs to be able to be operated one handed without tightly grasping or any twist on the wrist.

Stainless steel options are available, for ultimate corrosion resistance which come with a 10 year guarantee. These are shown in the 1st column above. Standard Black and White Zinc / Aluminium hardware is also covered with a 10 year guarantee.

Appearance and finish on hardware is subject to change. Also please take into account that the product photography may slightly differ from the physical item in terms of color, due to lighting during photo shoot and the print reproduction process.
